

Effective Immediately

Following the order issued by Governor Sununu

The Rye Water District has put a hold on all seasonal connections until
May 4th

We hope to be able to service the connections at that time; however, the District will continue to follow the guidelines of CDC and the orders of Governor Sununu.

Our primary concern is the health and safety of our residents and staff, along with providing the highest quality drinking water to our residents.

We appreciate your understanding during this time and will continue to take actions to keep residents informed.
